Hi sir...

We felt happy to attend this seminar, As we already thought was what for this seminar, we got to know much more about the subject and its applications and how depth the topic can be reached to learn and utilise in our daily life. And the process of development of application on the subject and utilisation of mathematics in other fields. The depth of the concept has to be learned to know the subject and how utilised in our daily life.

It makes us to get the more interest on the subject and learnt a little part of the mathematics. And then we understood that how important is basic knowledge required and we feel proud to study Mathematics as a subject.

Thank you..
